# **Capitalizing on Environmental Injustice**

## Nature's Meaning

Series Editor: Roger S. Gottlieb, Professor of Philosophy, Worcester Polytechnic Institute

Each title in Nature's Meaning is created to have the personal stamp of a passionate and articulate spokesperson for environmental sanity. Intended to be engagingly written by experienced thinkers in their field, these books express the comprehensive and personal vision of the topic by an author who has devoted years to studying, teaching, writing about, and often being actively involved with the environmental movement. The books will be intended primarily as college texts, and as beautifully produced volumes, they will also appeal to a wide audience of environmentally concerned readers.
