# Climate Change, Climate Science and Economics

Prospects for an Alternative Energy Future

G. Cornelis van Kooten  
Professor of Economics and Geography  
Canada Research Chair in Environmental Studies  
Department of Economics  
University of Victoria  
Victoria, BC, Canada

ISBN 978-94-007-4987-0      ISBN 978-94-007-4988-7 (eBook)

# Contents

|          |   |           |
|----------|---|-----------|
| <b>1</b> | <b>Introduction</b>                                       | <b>1</b>  |
| 1.1      | The Political Side of Climate                             | 2         |
| 1.2      | Engaging Climate Change Research                          | 7         |
| 1.3      | Plan of the Book  | 10        |
|          | References  | 12        |
| <b>2</b> | <b>Weather and the Instrumental Record</b>                | <b>15</b> |
| 2.1      | Collecting and Gridding Weather Data                      | 16        |
| 2.1.1    | Working with Instrumental Data                            | 17        |
| 2.1.2    | A Mini Heat Island Effect                                 | 18        |
| 2.1.3    | Aggregating Temperature Data                              | 22        |
| 2.2      | Available Instrumental Data                               | 25        |
| 2.2.1    | Surface Level Data Collection                             | 25        |
| 2.2.2    | Satellite Data  | 30        |
| 2.2.3    | Weather Stations and Global Temperature                   | 30        |
| 2.2.4    | Quality of Data Collection                                | 34        |
| 2.2.5    | Are the U.S. Temperature Data Reliable?                   | 34        |
| 2.3      | The Instrumental Record                                   | 37        |
| 2.3.1    | Global Temperature Reconstructions                        | 37        |
| 2.3.2    | Effect of Non-climatic Factors<br>on Temperature Measures | 44        |
| 2.4      | Weather Derivatives                                       | 48        |
| 2.4.1    | Weather Index Insurance                                   | 49        |
| 2.4.2    | Some Simple Examples of Weather Index Insurance           | 51        |
| 2.4.3    | Adapting to Climate Change                                | 52        |
| 2.5      | Discussion  | 53        |
|          | References  | 54        |
| <b>3</b> | <b>Climate Science and Paleoclimatology</b>               | <b>59</b> |
| 3.1      | Indisputable ‘Facts’ of Global Warming?                   | 63        |
| 3.2      | Evidence from Individual Weather Stations                 | 65        |

|          |   |            |
|----------|---|------------|
| 3.3      | Eliminating the Medieval Warm Period and Little Ice Age.....          | 71         |
| 3.3.1    | Analyzing Paleoclimatic Data.....                                     | 75         |
| 3.3.2    | The Hockey Stick.....   | 79         |
| 3.3.3    | The Climate Hockey Wars .....   | 85         |
| 3.3.4    | The Hockey Stick Strikes Back .....                                   | 89         |
| 3.3.5    | Hiding the Evidence?.....   | 91         |
| 3.3.6    | Temperatures and CO <sub>2</sub> Before Time .....                    | 94         |
| 3.4      | Discussion.....   | 95         |
|          | References.....   | 97         |
| <b>4</b> | <b>Emission Scenarios and Climate Modeling .....</b>                  | <b>101</b> |
| 4.1      | Emission Scenarios .....  | 102        |
| 4.1.1    | Models.....   | 103        |
| 4.1.2    | Emission Scenarios .....  | 106        |
| 4.2      | The Theory of Climate Modeling: Energy Balance.....                   | 110        |
| 4.2.1    | Radiative Transfer.....   | 110        |
| 4.2.2    | Feedbacks.....  | 114        |
| 4.2.3    | The Role of Carbon Dioxide.....                                       | 118        |
| 4.2.4    | Carbon Dioxide, Feedbacks and Cloud Formation.....                    | 121        |
| 4.3      | Climate Models.....   | 125        |
| 4.3.1    | Climate Models: A Brief Description .....                             | 125        |
| 4.3.2    | A Simple Energy Balance Model.....                                    | 129        |
| 4.4      | Are Climate Models Reliable?.....                                     | 135        |
| 4.4.1    | The Scientificity of Climate Models .....                             | 135        |
| 4.4.2    | Targeting the Answer .....  | 137        |
| 4.4.3    | Comparing Climate Model Predictions<br>with Actual Temperatures ..... | 139        |
| 4.5      | Discussion.....   | 142        |
|          | References.....   | 144        |
| <b>5</b> | <b>Alternative Explanations .....</b>                                 | <b>147</b> |
| 5.1      | Explanations That Exclude the Sun and the Cosmos.....                 | 151        |
| 5.1.1    | Bio-thermostat.....   | 152        |
| 5.1.2    | Cloud Formation and Albedo.....                                       | 154        |
| 5.1.3    | Human Forcings Other than Greenhouse Gases .....                      | 155        |
| 5.1.4    | Ocean Currents.....   | 156        |
| 5.2      | Cosmological Climate Change .....                                     | 158        |
| 5.2.1    | Solar Variability: Evidence of a Solar Effect .....                   | 158        |
| 5.2.2    | Solar Wind Modulation of Cosmic Rays .....                            | 161        |
| 5.2.3    | Solar-Arctic Connection .....   | 163        |
| 5.2.4    | Planetary Motion.....   | 163        |
| 5.3      | Climate Science, Climategate and the IPCC .....                       | 165        |
| 5.3.1    | Neutrality of IPCC Assessors .....                                    | 167        |
| 5.3.2    | The IPCC ‘Gates’ .....  | 169        |
| 5.4      | Discussion.....   | 173        |
