

Dictionary & Introduction

to **GLOBAL
ENVIRONMENTAL
GOVERNANCE**

Richard E. Saunier • Richard A. Meganck

Second Edition • Fully revised and updated

Further praise for the Dictionary and Introduction to Global Environmental Governance

‘This book offers vital information for those who would engage in environmental management and governance – a real world test for policy makers today.’

**Senator Timothy E. Wirth, President,
United Nations Foundation**

‘I love dictionaries. They help you think more systematically. This one is certainly a great help. If it had been available ten years ago, talks on climate or on sustainable development could have produced better results. To be used by students, negotiators, policy makers, members of parliament and all citizens interested in environment and governance.’

Dr Jan Pronk, Former Special Representative to the UN Secretary General in Darfur, Former Minister for Development Cooperation, The Netherlands, Former Minister of the Environment, The Netherlands

‘How amazing to find a spirited and passionate glossary! Yea, though the book winds through the Kingdom of Acronym, via baffling paths of the International Labyrinth, the depth of knowledge, experience and commitment of the authors illuminate the dark corners and in no uncertain terms set out where the road ahead must lead.’

Margaret Catley-Carlson, Chair, World Economic Forum Global Advisory Panel on Water

‘Saunier and Meganck have zeroed-in on one of the most confounding issues related to Global Environmental Governance: language and most importantly its context. This book will become the “yellow pages” for students and practitioners alike, assisting them in becoming “fluent” in the ways of GEG and envirospeak.’

James Gustave Speth, Dean, Yale School of Forestry, Former Administrator of UNDP

‘Saunier and Meganck have identified an important and to date unfilled niche in the successful negotiation of international environmental agreements – that being precision in the selection and use of language. Without question, this book should be a great help to the novice and veteran negotiator alike; at a minimum ensuring that they are at least on the same page as to understanding what each other is proposing.’

Dr Yolanda Kakabadse, Senior Adviser, Fundación Futuro Latinoamericano

'A splendid guide to the choppy waters and sea of acronyms of global governance for the environment ... indispensable and illuminating ... a virtual astrolabe for international environmental policy.'

Dr Tom Lovejoy, President, The Heinz Center for Science, Economics and the Environment

'Words matter – they transform ideas into action. This power of communication is amplified with a common vocabulary. Saunier and Meganck's ambitious glossary makes a valuable contribution to enhancing the potential of global environmental agreement.'

Elizabeth Dowdeswell, Former Executive Director, UNEP

'This book helps clarify the steps needed to overcome a major obstacle towards measurable progress on the goals set by governments: clarity of purpose.'

Ambassador Jack Vaughn, Founding Chairman, Conservation International

'Finally a volume that dares to take on the complex challenge of Global Environmental Governance and, in the process, succeeds in mobilizing the scholarship necessary to introduce the subject in a way that is both comprehensible and engaging. Bravo gentlemen.'

Dr Noel Brown, President and CEO, Friends of the United Nations

'If you like your governance well-done and not rare, you'll love this dictionary. Add its 5500 definitions, treaties and acronyms to your vocabulary and you'll soon be writing like a true specialist in global environmental governance (GEG)... The best read of all: the 35-page essay on GEG itself.'

Paul Osborn, Mediateurs, Uithoorn
