

Earth System Analysis for Sustainability

Goals for this Dahlem Workshop:

- To evaluate whether current geophysical hypotheses are testable in the light of astrobiology,
- To gain a structural understanding of the Earth's functioning during the late Quaternary,
- To clarify the prospects and boundary conditions of global (e.g., carbon or water) cycle management, including necessary economic transformations,
- To discern which type of global institutions will be necessary to implement such a strategy and, conversely, which type of strategies stand the best chance of becoming institutionalized.

Report of the 91st Dahlem Workshop on
Earth System Analysis for Sustainability
Berlin, May 25–30, 2003

Held and published on behalf of the
President, Freie Universität Berlin: D. Lenzen

Scientific Advisory Board: H. Keupp and R. Tauber, Chairpersons
N.S. Baer, G. Braun, E. Fischer- Lichte,
F. Hucho, K. Labitzke, R. Menzel,
J. Renn, H.-H. Ropers, E. Sandschneider,
M. Schäfer-Korting, L. Wöste

Executive Director: W. de Vivanco

Program Director, Series Editor: J. Lupp

Assistant Editors: G. Custance, C. Rued-Engel

Funded by:
Deutsche Forschungsgemeinschaft
Deutscher Akademischer Austausch Dienst
Andrea von Braun Stiftung

Earth System Analysis for Sustainability

Edited by

Hans Joachim Schellnhuber, Paul J. Crutzen,
William C. Clark, Martin Claussen, and
Hermann Held

Program Advisory Committee:

Hans Joachim Schellnhuber, Paul J. Crutzen, and
William C. Clark, Chairpersons
Martin Claussen, Hermann Held, Tim M. Lenton, and
Will Steffen

CIENCIAS AMBIENTALES

Contents

Dahlem Workshops	vii
List of Participants	xi
1 Science for Global Sustainability: Toward a New Paradigm <i>W. C. Clark, P. J. Crutzen, and H. J. Schellnhuber</i>	1
2 What Does History Teach Us about the Major Transitions and Role of Disturbances in the Evolution of Life and of the Earth System? <i>T. M. Lenton, K. G. Caldeira, and E. Szathmáry</i>	29
3 Is Life an Unavoidable Planetary Phenomenon Given the Right Conditions? <i>F. Westall and F. D. Drake</i>	53
4 What Are the Necessary Conditions for Origin of Life and Subsequent Planetary Life-support Systems? <i>S. A. Franck and G. A. Zavarzin</i>	73
5 Destiny of Humankind from an Astrobiology Point of View: Does Astrobiology Provide an Exit Option for Terrestrial Mismanagement? <i>G. Horneck and H. J. Schellnhuber</i>	91
6 Group Report: Long-term Geosphere–Biosphere Coevolution and Astrobiology <i>T. M. Lenton, Rapporteur</i> <i>K. G. Caldeira, S. A. Franck, G. Horneck, A. Jolly, E. Rabbow, H. J. Schellnhuber, E. Szathmáry, F. Westall, G. A. Zavarzin, and H. Zimmermann-Timm</i>	111
7 What Do We Know about Potential Modes of Operation of the Quaternary Earth System? <i>M. Claussen, H. Held, and D. P. Schrag</i>	141
8 Modes of Oceanic and Atmospheric Circulation during the Quaternary <i>S. Rahmstorf and F. Sirocko</i>	157
9 What Is the Quaternary Phase-space Topology According to Cryosphere Dynamics? <i>A. J. Payne</i>	171

10	Group Report: Possible States and Modes of Operation of the Quaternary Earth System	189
	<i>A. J. Watson, Rapporteur</i> <i>V. Brovkin, M. Claussen, P. G. Falkowski, H. Held, A. J. Payne, S. Rahmstorf, R. J. Scholes, D. P. Schrag, and F. Sirocko</i>	
11	Human Footprints in the Ecological Landscape	211
	<i>P. G. Falkowski and D. Tchernov</i>	
12	How Humankind Came to Rival Nature: A Brief History of the Human–Environment Condition and the Lessons Learned	227
	<i>B. L. Turner II and S. R. McCandless</i>	
13	Anthropogenic Modification of Land, Coastal, and Atmospheric Systems as Threats to the Functioning of the Earth System	245
	<i>M. O. Andreae, L. Talaue-McManus, and P. A. Matson</i>	
14	Atmospheric Chemistry and Climate in the Anthropocene: Where Are We Heading?	265
	<i>P. J. Crutzen and V. Ramanathan</i>	
15	Assessing and Simulating the Altered Functioning of the Earth System in the Anthropocene	293
	<i>P. M. Cox and N. Nakicenovic</i>	
16	Group Report: Earth System Dynamics in the Anthropocene	313
	<i>W. Steffen, Rapporteur</i> <i>M. O. Andreae, B. Bolin, P. M. Cox, P. J. Crutzen, U. Cubasch, H. Held, N. Nakicenovic, L. Talaue-McManus, and B. L. Turner II</i>	
17	The Mental Component of the Earth System	341
	<i>W. Lucht and R. K. Pachauri</i>	
18	What Kind of System of Science (and Technology) Is Needed to Support the Quest for Sustainable Development?	367
	<i>G. C. Gallopin</i>	
19	Institutions, Science, and Technology in the Transition to Sustainability	387
	<i>R. B. Mitchell and P. Romero Lankao</i>	
20	Group Report: Sustainability	409
	<i>A. P. Kinzig, Rapporteur</i> <i>W. C. Clark, O. Edenhofer, G. C. Gallopin, W. Lucht, R. B. Mitchell, P. Romero Lankao, S. Sreekes, C. Tickell, and O. R. Young</i>
