

Economic Development and Environmental Sustainability

THE INITIATIVE FOR POLICY DIALOGUE SERIES

The Initiative for Policy Dialogue (IPD) brings together the top voices in development to address some of the most pressing and controversial debates in economic policy today. The IPD book series approaches topics such as capital market liberalization, macroeconomics, environmental economics, and trade policy from a balanced perspective, presenting alternatives and analyzing their consequences on the basis of the best available research. Written in a language accessible to policymakers and civil society, this series will rekindle the debate on economic policy and facilitate a more democratic discussion of development around the world.
