Contents

List of Tables and Figures	xvii
Preface	xxi
Part I. Theory and Fundamentals	1
1. Introduction to Environmental and Natural Resources Economics	3
Introduction	3
Fundamental Concepts	5
Some Reasons for Optimism and Some Reasons for Concern	10
<i>Reasons for Optimism</i>	10
<i>Reasons for Concern</i>	13
Overview	14
Summary	16
Review Questions and Problems	17
Internet Links	18
References and Further Reading	19
2. Value Systems and Economic Systems	21
Introduction	21
Fundamentals of Ethical Systems	22
<i>Deontological Ethics</i>	23
<i>Teleological Ethics</i>	25
<i>A Closer Look at Utilitarianism</i>	26
Self-Interest, the Common Good, and Social Order	30
Private Property	32
<i>Locke and the Liberal Society</i>	33

<i>Rousseau and the Civil Society</i>	33
On Positive and Normative Economics	35
Economic Questions That All Societies Must Answer	36
Summary	36
Review Questions and Problems	37
Internet Links	39
References and Further Reading	
3. The Economics of Market Allocation	41
Introduction	41
Market Capitalism	41
Conditions Required for a Well-Functioning Competitive Market	42
Market Demand and Supply	43
<i>Market Demand</i>	43
<i>Market Supply</i>	47
Market Equilibrium and Efficiency	51
<i>Market Equilibrium</i>	51
<i>Efficient Resource Allocation</i>	52
Market Failure	55
<i>Monopoly, Cartels, and Market Power</i>	55
<i>Externalities</i>	56
<i>Common-Pool Resources and Public Goods: Collectively Produced and/or Consumed Goods</i>	57
<i>Imperfect Information</i>	58
<i>Fairness, Equity, and Distributive Justice</i>	58
Perspectives on Market Failures and Government Intervention	59
Summary	69
Review Questions and Problems	60
Internet Links	62
References and Further Reading	63
Appendix: A Calculus-based Derivation of Supply Curves	64
4. Externalities, Market Failures, and Policy Interventions	66
Introduction	66
Positive Externalities	66
Negative Externalities	69
<i>Property Rights and Negative Externalities</i>	70
<i>Social Cost as the Sum of Private and External Cost</i>	73
<i>Competitive Markets Are Inefficient When There Are Negative Externalities</i>	75

<i>Pigouvian Taxes: The Theory of Policy Interventions for Negative Externalities</i>	79
Summary	82
Review Questions and Problems	83
Internet Links	85
References and Further Reading	86
5. The Economics of Natural Resource Systems	
Part I: Theory and Concepts	88
Introduction and Overview	88
Allocating Nonrenewable Resources	90
<i>The Industrial Organization of Energy Delivery in the United States</i>	90
<i>The Theory of Dynamically Efficient Nonrenewable Resource Pricing</i>	92
<i>Present Value Analysis</i>	93
<i>Dynamic Efficiency</i>	94
Allocating Recyclable Resources	102
Allocating Renewable Resources	105
Allocating Common-Pool Resources	106
Ecosystem Services and Natural Capital	113
Resources for the Future: Factors Affecting Future Resource Scarcity	114
Summary	117
Review Questions and Problems	119
Internet Links	120
References and Further Reading	121
Appendix: The Prisoner's Dilemma and the Tragedy of the Commons	123
Part II. Policy	127
6. The Economics of Natural Resource Systems,	
Part II: Marine Capture Fisheries	129
Introduction	129
World Trends	130
Bioeconomic Model of a Fishery	134
Fishery Management	139
Individual Quotas	141
Aquaculture	146
Summary	148

Review Questions and Problems	149
Internet Links	150
References and Further Reading	151
7. Measurement and Analysis of Benefits and Costs	153
Introduction: Benefit/Cost Analysis	153
<i>Efficiency</i>	156
<i>Maximizing Net Present Value (PV)</i>	157
<i>An Illustrative Example of Benefit/Cost Analysis</i>	158
<i>The Coase Theorem</i>	161
<i>Operationalizing Benefit/Cost Analysis in U.S. Environmental Policy</i>	163
Measuring Benefits	164
<i>Overview</i>	164
<i>Measuring the Health and Ecological Benefits of Regulation: Quantitative Risk Assessment (QRA) and the Value of a Statistical Life</i>	166
<i>Categories of Nonmarketed Environmental Benefits:</i>	
<i>Use and Nonuse Values</i>	170
<i>Use Values</i>	170
<i>Nonuse Values</i>	170
<i>Measuring Nonmarketed Environmental Benefits:</i>	
<i>The Contingent Valuation Method (CVM)</i>	171
<i>Examples of CVM Studies</i>	174
<i>The CVM Debate</i>	176
<i>Measuring Nonmarketed Environmental Benefits:</i>	
<i>The Travel Cost Method (TCM)</i>	178
<i>Measuring Nonmarketed Environmental Benefits:</i>	
<i>Hedonic Regression Method (HRM)</i>	182
<i>Other Valuation Approaches</i>	184
Measuring Costs	186
<i>Direct Costs</i>	186
<i>Indirect Costs</i>	188
Summary	192
Review Questions and Problems	194
Internet Links	197
References and Further Reading	198
8. The Political Economy of Environmental Regulation and Resource Management	203
Introduction: What Is Political Economy?	203

Economic Models of Political Economy and the Regulatory Process	205
<i>Introduction</i>	205
<i>The Political Market for Regulation</i>	207
The Political Economy of Environmental Regulation: A Selective Survey	210
The Political Economy of Locally Self-Governed Common-Pool Resources	212
The Political Economy of International Environmental Accords: The Case of the Montreal Protocol	216
<i>Theoretical Foundation</i>	216
<i>Case Study: The International Political Economy of CFC Control</i>	217
Summary	221
Review Questions and Problems	223
Internet Links	225
References and Further Reading	226
9. Motivating Regulatory Compliance: Monitoring, Enforcement, and Sanctions	229
Introduction	229
The Economics of Crime	229
<i>The Economics of Deterrence</i>	231
<i>Criminal Penalties and Incarceration Versus Fines and Monetary Damages</i>	235
<i>Market-based Reputational Enforcement and Voluntary Overcompliance</i>	236
<i>Private Auditing</i>	240
<i>Incentive Enforcement Systems</i>	241
EPA Enforcement	242
Selected Civil and Criminal Case Summaries from the Department of Justice	245
California Enforcement	247
Compliance	249
Citizen Suits	250
Summary	250
Review Questions and Problems	251
Internet Links	252
References and Further Reading	253
10. Creating Economic Incentives for Environmental Protection and Resource Management	255
Introduction	255

Marketable Pollution Allowances	258
An Illustration of the Cost-Savings Potential from Marketable Pollution Allowances	259
<i>Case 1: Traditional Uniform Performance Standard and No Marketable Allowances</i>	260
<i>Case 2: Cap and Trade</i>	261
<i>Case 3: Limited Allowance Trading</i>	265
<i>Advantages of Marketable Allowance Systems</i>	266
<i>Disadvantages of Marketable Allowance Systems</i>	266
Marketable Pollution Allowances and the Clean Air Act (CAA)	
Amendments of 1990: The Acid Rain Program	267
Renewable Portfolio Standard (RPS)	270
Emissions Trading	271
Other Experiments with Marketable Allowances	272
Environmental Taxes	274
<i>Environmental Taxes in the United States</i>	274
<i>Environmental Taxes Around the World</i>	275
Summary	276
Review Questions and Problems	278
Internet Links	280
References and Further Reading	281
11. Global Climate Change: Science, Policy, and Economics	283
Introduction	283
Greenhouse Gas Emissions and Global Climate Change	286
<i>Modeling Carbon Dioxide Emissions</i>	286
<i>Trends in Greenhouse Gas Emissions</i>	288
<i>Global Climate Change Predictions</i>	290
The Evidence Regarding Global Climate Change	296
International Action on Global Climate Change	299
<i>The Earth Summit</i>	302
<i>The Kyoto Protocol</i>	303
Policy Studies: The Economics of Controlling Greenhouse Gas Emissions	305
Summary	312
Review Questions and Problems	314
Internet Links	315
References and Further Reading	318
Part III. Topics on the Economics of Sustainability	321
12. Introduction to the Concept of Sustainability	323
Introduction	323

Sustainable Development	325
Conservation-based Development	328
A Working Definition of Sustainability	329
Summary	334
Review Questions and Problems	335
Internet Links	336
References and Further Reading	338
13. Recognizing Interdependencies and Thinking Long Term	339
Introduction	339
Recognizing Interdependencies	339
<i>The Industrial Revolution and the Agrarian Transition</i>	340
<i>Income, Poverty, and Economic Growth</i>	342
<i>Education, Empowerment, and Justice</i>	349
<i>International Trade</i>	355
<i>The Argument for Free International Trade</i>	356
<i>The Argument Against Free International Trade</i>	359
<i>Population</i>	365
<i>The Demographic Transition Model</i>	366
<i>Population Forecasts</i>	369
<i>Taxes and Incentives</i>	371
Thinking Long Term: Discounting and Policy Making	373
<i>The Effect of Discount Rates on Environmentally Friendly</i> <i>Investments and Sustainability: An Illustrative Example</i>	375
<i>The Opportunity Cost of Capital and the Social Rate of</i> <i>Time Preference</i>	377
<i>The Opportunity Cost of Capital</i>	377
<i>The Social Rate of Time Preference</i>	378
<i>Are the Discount Rates Associated with Competitive</i> <i>Financial Markets Consistent with Those Required for</i> <i>Sustainability?</i>	379
Summary	381
Review Questions and Problems	384
Internet Links	386
References and Further Reading	387
14. Sustainable Economic Development	391
Introduction	391
Conventional Economic Development Strategies	392
<i>Conventional Economic Development Assistance Programs</i>	392
<i>Case Studies</i>	396

Envisioning Sustainable Development: The Brundtland Commission Report, the Earth Summit, the Millennium Development Goals, and Beyond	398
Theories of Sustainability	402
<i>Weak Sustainability</i>	403
<i>Strong Sustainability</i>	404
<i>Practical Policy Implications</i>	405
Sustainability Indicators	406
<i>Indicators of Weak Sustainability</i>	408
<i>Indicators of Strong Sustainability</i>	413
Case Studies in Measuring Sustainable Economic Development	415
<i>Scotland</i>	415
<i>United States</i>	416
<i>Sub-Saharan Africa, Latin America, and the Caribbean</i>	417
Summary	417
Review Questions and Problems	418
Internet Links	419
References and Further Reading	421
15. Issues in Sustainable Production and Consumption	426
Introduction	426
More Sustainable Energy Resources, Technologies, and Processes	429
<i>Solar Energy</i>	429
<i>Industrial Ecology</i>	435
Policies Promoting Sustainable Production and Consumption	438
<i>Extended Producer Responsibility (EPR)</i>	438
<i>Ecolabels</i>	440
<i>Factors Relating to the Success of Ecolabel Programs</i>	441
<i>Three Examples of Ecolabeled Goods</i>	442
<i>Taxes, Subsidies, and Ecological Tax Reform</i>	443
<i>Government Research and Development Funding</i>	443
<i>International Environmental Certification</i>	444
Consumer Preferences and Sustainable Consumption	446
Summary	448
Review Questions and Problems	449
Internet Links	450
References and Further Reading	451
16. Issues in the Economics of Sustainable Local Communities	453
Introduction	453
Sustainable Local Self-Governance of CPR Systems	454

Examples of Sustainable Local Communities and the Systems	
They Use for Governing CPRs	455
<i>Törbel, Switzerland</i>	455
<i>Japanese Village Commons</i>	456
<i>Spanish Irrigation Commons</i>	456
<i>Localized Self-Governance of Fisheries</i>	457
<i>Fodder and Fuelwood Use in Panchayat Community Forests</i>	458
<i>Ostrom's Design Principles Associated with Sustainable Local Self-Governance of Common-Pool Resources</i>	459
Retrospective on CPRs and Local Self-Governance	461
Integrating Sustainability into Local Economic Development	462
<i>A Model of the Local Economy</i>	463
<i>Different Approaches to Economic Development</i>	467
<i>Case Studies</i>	472
<i>Arcata</i>	472
<i>The Cogtong Bay Mangrove Management Project</i>	474
<i>Sustainable Local Economic Development in South Africa</i>	475
<i>Moving Toward Sustainable Urban Planning in Curitiba, Brazil</i>	476
Summary	477
Review Questions and Problems	479
Internet Links	480
References and Further Reading	481
Glossary	483
Index	511
