

ENVIRONMENTAL AND RESOURCE VALUATION
WITH REVEALED PREFERENCES

THE ECONOMICS OF NON-MARKET GOODS AND RESOURCES

VOLUME 7

Series Editor: Dr. Ian J. Bateman

Dr. Ian J. Bateman is Professor of Environmental Economics at the School of Environmental Sciences, University of East Anglia (UEA) and directs the research theme Innovation in Decision Support (Tools and Methods) within the Programme on Environmental Decision Making (PEDM) at the Centre for Social and Economic Research on the Global Environment (CSERGE), UEA. The PEDM is funded by the UK Economic and Social Research Council. Professor Bateman is also a member of the Centre for the Economic and Behavioural Analysis of Risk and Decision (CEBARD) at UEA and Executive Editor of Environmental and Resource Economics, an international journal published in cooperation with the European Association of Environmental and Resource Economists. (EAERE).

Aims and Scope

The volumes which comprise *The Economics of Non-Market Goods and Resources* series have been specially commissioned to bring a new perspective to the greatest economic challenge facing society in the 21st Century; the successful incorporation of non-market goods within economic decision making. Only by addressing the complexity of the underlying issues raised by such a task can society hope to redirect global economies onto paths of sustainable development. To this end the series combines and contrasts perspectives from environmental, ecological and resource economics and contains a variety of volumes which will appeal to students, researchers, and decision makers at a range of expertise levels. The series will initially address two themes, the first examining the ways in which economists assess the value of non-market goods, the second looking at approaches to the sustainable use and management of such goods. These will be supplemented with further texts examining the fundamental theoretical and applied problems raised by public good decision making.

For further information about the series and how to order, please visit our Website

Dedication

To Ivar and my mom, both of whom have put up with a lot over the years.

N.E.B.

For Ginny, for helping in many ways.

K.E.M.

Contents

List of Figures	xiii
Preface	xv
1 Setting the Stage	1
1.1 Oil Spills and Valuation	1
1.2 Where Do We Begin?	3
1.3 The Purpose and Approach of the Book	4
1.4 The Maintained Assumptions	5
1.5 What the Book Omits	7
1.6 A Look Ahead	9
2 Welfare Economics for Price Changes	11
2.1 Introduction	11
2.2 Compensation Measures	16
2.2.1 Willingness to Pay and Willingness to Accept	20
2.3 From Behavior to Welfare Measures	21
2.3.1 So What is Wrong with Consumer Surplus?	23
2.4 From Ordinary Demands to Welfare	25
2.4.1 Multiple Price Changes	28
2.5 Income and Welfare Effects	31
2.5.1 Endogenous Income	32
2.6 Non-Linear Budget Constraints	37
2.7 Conclusions	39
3 The Concept of Weak Complementarity	41
3.1 Introduction	41
3.2 The Basic Problem	43
3.3 The Public Good as an Attribute	45
3.3.1 Weak Complementarity	45
3.3.2 Can Weak Complementarity Be Tested?	49

3.4	Weak Complementarity and Marshallian Demands	55
3.4.1	The Willig Condition	58
3.5	Welfare without Weak Complementarity	63
3.6	Conclusions	66
4	Implementing Weak Complementarity	67
4.1	Introduction	67
4.2	Specifying Demand as a Function of Quality	67
4.2.1	Translations of Utility Functions	69
4.2.2	Utility Parameters as a Function of Quality	73
4.3	Weak Complementarity and Household Production	74
4.3.1	Household Production and Constant Marginal Costs	76
4.3.2	Incorporating Time Costs	78
4.3.3	Time in Incomplete and Partial Demand Systems	83
4.3.4	On-Site Time and Non-linear Budget Constraints	86
4.4	Information and Behavioral Change	91
4.5	Quality Changes and Induced Price Effects	94
4.5.1	Induced Price Changes	96
4.6	Conclusions	99
5	Measuring Welfare in Discrete Choice Models	101
5.1	Introduction	101
5.2	The Basic Discrete Choice Model	104
5.3	Welfare in the Random Utility Model	108
5.3.1	More Welfare Calculations with the Linear Model.	112
5.3.2	Welfare Measurement with Imperfect Information	114
5.4	Generalizing Discrete Choice Models	117
5.4.1	Nested Models: Relaxing the IIA Property	118
5.4.2	Mixed Logit Models: A Further Generalization	124
5.5	The Larger Consumer Choice Problem	127
5.5.1	The Role of Income	127
5.5.2	The Frequency of Choice	131
5.5.3	The Generalized Corner Solution Model	138
5.6	The Hedonic Travel Cost Model	141
5.6.1	The Structure of the Model	142
5.6.2	The Hedonic Cost Function	143
5.6.3	Making Sense of the Story	144
5.6.4	Welfare Measures in the Hedonic Travel Cost Model	147
5.7	Conclusion	149

6 Hedonic Models of Heterogeneous Goods	151
6.1 Introduction	151
6.2 The Theory of Hedonic Models	152
6.2.1 Rosen's Bid Function	154
6.2.2 The Hedonic Price Function	157
6.3 Welfare Measures in Hedonic Markets	160
6.3.1 Defining 'Pure Willingness to Pay'	161
6.3.2 Revealing 'Pure Willingness to Pay'	163
6.3.3 Welfare Effects of Exogenous Events	168
6.4 Some Econometric Issues	174
6.4.1 Estimating the Hedonic Price Function Only	175
6.4.2 Recovering Information on Preferences	177
6.5 The Housing Choice as a Discrete Choice	180
6.5.1 Drawbacks of Discrete Choice Housing Models	183
6.6 Conclusions	186
7 Hedonic Wage Analysis	189
7.1 Introduction	189
7.2 Hedonic Wages in Theory	190
7.2.1 The Simple Model	191
7.2.2 Revising the Model: The Wage vs Risk Trade-off	195
7.2.3 Important Underlying Assumptions	198
7.2.4 The Determinants of the Hedonic Function	201
7.2.5 The Anomaly of Safer Jobs and Higher Pay	203
7.2.6 Endogenous Sorting	205
7.2.7 Welfare with the Hedonic Wage Model	207
7.3 Estimating the 'Value of a Statistical Life'	209
7.3.1 Data Sources for Wage and Risk Variables	211
7.3.2 Variability in Specifications	213
7.3.3 Fragility of Estimates of the Wage-Risk Trade-off	218
7.3.4 The Challenge of Transferring <i>VSL</i> Estimates	223
7.4 Wage Hedonics and Locational Amenities	228
7.4.1 The Roback Model	229
7.4.2 Migration and Disequilibrium	233
7.4.3 Welfare Interpretations	235
7.4.4 Locational Amenities in a Discrete Choice Framework	239
7.5 Conclusions	241

8 Public Goods in Household Production	243
8.1 Introduction	243
8.2 The Structure of the Problem	244
8.2.1 A Simple Result for Constant Marginal Costs	245
8.3 Restrictions on the Demand for an Input	247
8.3.1 The Case of a Separable Production Relationship	248
8.3.2 Demand for Essential Inputs	251
8.3.3 Weak Substitutability	256
8.4 Bounds Using Defensive Expenditures	258
8.4.1 Framing the Problem and Finding Marginal Values	259
8.4.2 Bartik's Principal Results	262
8.4.3 Actual Savings in Defensive Expenditures	268
8.4.4 Lumpy Technologies and Discrete Choices	271
8.5 Cost of Illness and Defensive Expenditure	273
8.5.1 The Model with Cost of Illness	274
8.5.2 Cost of Illness and Bartik's Results	278
8.5.3 Mitigation and Costs of Illness	280
8.6 Conclusions	284
8.7 Appendices	285
8.7.1 Appendix A: Comparative Statics for Cost Minimization	285
8.7.2 Appendix B: Alternative Motivation for Bartik's Bounds	286
9 The Environment as an Input into Firms' Production	289
9.1 Introduction	289
9.2 Welfare Measures for Firm Owners	290
9.2.1 Defining Welfare for the Firm	291
9.2.2 Exact Welfare Measures for Price Changes	293
9.2.3 Valuing Changes in an Environmental Input	298
9.2.4 Aggregation and Market Interactions	304
9.3 The Household as Producer	306
9.3.1 Separability of Production and Consumption	307
9.3.2 Welfare Effects of Price Changes with Separability	311
9.3.3 Welfare Effects for the Environment as an Input	314
9.4 Welfare Bounds and Approximations	318
9.4.1 Approximations by Pricing Output Changes	318
9.4.2 Approximating Welfare Changes Using Cost Data	324
9.5 Examples of the Environment as an Input	327
9.5.1 The Welfare Effects of Changes in Ozone Levels	327
9.5.2 Welfare Effects in Fisheries	330
9.6 Conclusions	333

10 Some Broader Considerations	335
10.1 The Territory Covered	335
10.2 When <i>Not</i> To Do Valuation	336
10.3 Stated or Revealed Preference?	338
10.4 Some Concluding Thoughts	340
10.4.1 Behavioral Economics	340
10.4.2 Valuing Ecosystem Services	342
References	345
Index	371
